Environmental Policy

Trimoro is committed to minimizing negative impacts from our business and operations, as well as our value chain. We also see positive potential of our digital services that can help enable our value chain and customers to move forward to green and sustainable economy.

Therefore, we aim to make a contribution to the Sustainable Development Goals (SDGs), the Paris Climate Agreement, Thailand's National Strategy on eco-friendly development and growth, and related guidance by developing our environmental policy under which we commit to protect the environment, manage risks and opportunities from the climate change, and promote digital innovation to enable our customers and business partners to consume and conduct businesses in greener and more sustainable manners.

Environmental Management System

Trimoro establish an environmental management system which included this environmental policy, establish the environmental aspect and impact assessment,

Trimoro provide training and information about environmental risks and controls to all relevant employees. These shall be given in a format and language that workers can easily understand.

Hazardous Substances Management

Trimoro will maintain an inventory of hazardous substances at facilities. Safety data sheets (or equivalent) shall be accessible wherever hazardous substances are used and their associated risks shall be clearly and actively communicated to all employees who work with them.

Trimoro will not manufacture, trade or use chemicals and hazardous substances subject to international bans. Any hazardous substances subject to international phase-outs shall not be manufactured or traded and their use shall be phased out in accordance with the regulation.

Wherever technically feasible and economically viable, Trimoro will use alternatives to hazardous substances in their business processes.

Waste and Emissions Management

Trimoro will identify significant wastes and emissions to air, water and land generated in their business processes in accordance with our environmental management system.

Trimoro will responsibly manage the identified wastes and emissions. In particular, they shall:

- a. Quantify wastes and emissions to manage and monitor trends over time and drive continuous improvement in environmental performance.
- b. Apply the principles of reduce, reuse, recycle and recover to minimise environmental impact where applicable, including reducing greenhouse gas emissions and increasing energy efficiency in alignment with next session.
- c. Discharge or dispose of wastes and emissions in compliance with applicable law or, where applicable law does not exist, in line with prevailing international standards.

Use of Natural Resources

In alignment with the approach the environmental management, Trimoro will monitor energy and water use in their business and establish energy and water efficiency initiatives.

Trimoro will identify other significant natural resources used in their business and seek to ensure their efficient use.

Trimoro will work towards using renewable energy in alignment with national frameworks, targets and/or legislation.
